Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant presented to the Examiner proposed amendments to overcome the prior art rejection in the non-final office action mailed 08/22/2007. Proposed Amendments included "a designation section for accepting, during the reproduction of the video data, an instruction from a user to designate one of the plural pieces of still picture data displayed on the screen; and a correlation section for, upon the instruction entered by the user during the reproduction of the video data, correlating the designated one of the plural pieces of still picture data with reproduction time position in the video data". The applicant pointed out the direct support in the specification to support the amendments and stated that the proposed amendments might overcome the prior art relied upon in the previous office action. The Examiner notes that the discussion of the prior art rejection along with the proposed amendments might overcome the previous art rejection and will require further consideration and an updated search before making a final determination on allowability..
